**Units** : 1

**Beneficiary Details:**

**Name** : Ata Ur Rehman Khurashi  
**Age** : 71 Years  
**Add** : 7 505, Khursh Nagar, Central Delhi  
**Type of surgery** : Cataract  
**Date of surgery** : 3/01/11

**Brief Description:**

Rehman Khurashi, a 71 years old man came to our hospital with complaint of dimness of vision for both distance and near since 3 months. On examination he was diagnosed with Mature Senile Cataract of the left eye. He was advised for cataract surgery for the left eye.

He underwent left eye cataract surgery and has regained vision from counting fingers to 6/12. He was happy as after the surgery he can perform his day to day activities more easily now.

At Dr. Shroff's Charitable Eye Hospital, our mission is "to make a lasting impact on the eradication of blindness and deafness in India by providing quality care to all sections of the society".

Our community outreach initiatives include setting up Vision Centers (primary eye care centre) and Secondary Eye Hospitals in the rural hinterlands of India, thereby taking quality eye care to the very doorsteps of the under served and underprivileged people of India. The patients identified for eye and ear surgeries are brought to the hospital where they undergo physical fitness test, are operated upon and then left back the next day after the first follow up. The treatment of these patients is totally free of charge or highly subsidized (in complicated cases.)

Your contribution is very valuable as it gives someone the power to see and hear!
