TRN-0006605074/TD-0007233281	Protect the health of poor tribals by contributing to a fund for out-patient treatment at the Gudalur Adivasi Hospital	Sandiya	Success	14-Sep-2017	Sandiya is a 9 year old girl studying in Vidhyodaya. Her mother works in the same school. Sandiya is a brilliant child and shows deep interest in theater. She flashed a wide smile when her mother spoke about her stage performances. She enjoys studying and playing with her friends. She had visited Ashwini for common cold in the month of April and the mother confirmed that they did not pay anything to the clinic. Sandhiya is now doing fine while having access to good healthcare and great education system.	Ishwarya
TRN-0006605074/TD-0007233281	Protect the health of poor tribals by contributing to a fund for out-patient treatment at the Gudalur Adivasi Hospital	Maran	Success	15-Sep-2017	Maran's house was the most difficult to locate. The house or I would rather say a tiny hutment was on the top of the forest and a good 45 min trek wading through forests was an experience; makes us think about the kind of inaccessibility that the tribes face. Maran is extremely diabetic. He visits Ashwini to take his treatment but with his health deteriorating, he is unable to keep up. The health inspectors from Ashwini visit him regularly. He confirmed that he visited Ashwini in the month of May and did not pay any fees. Maran has his own little coffee plantation that he send it to the village to grind. He belongs to the Katunayaka tribe - one of the most backward adivasi tribes after the Paniya. It took a lot to convince these tribes including Maran to access healthcare that is available to them. One of the most interesting thing during the visit was that the local ayurvedic experts and Maran have used herbs to create a drink which keeps his insulin in control, an alternative to insulin injections. Not sure of the results yet but yes, the forest teaches you ample.	Ishwarya
TRN-0006605074/TD-0007233281	Protect the health of poor tribals by contributing to a fund for out-patient treatment at the Gudalur Adivasi Hospital	Kutti	Success	15-Sep-2017	Kutti belongs to the Nalambakottai tribe, one of the most developed tribe to be honest. However, the steps to reach the village are extremely steep (extremely being an understatement). Kutti was carrying rice back home on his head and slipped on those steps and broke his neck. He was in the hospital for 2 months and is getting better now. Kutti was not available and we met his wife Kempa. Kempa clearly did not remember whether Kutti went to the hospital but we cross checked the same with the hospital records. Kutti is a father of two, and does some cultivation in a tiny piece pf lands he owns.	Ishwarya

TRN-0006621048/TD-0007250274	Provide dental hygiene for poor tribals by supporting a fund for dental care at the Gudalur Adivasi Hospital	Ganeshan	Success	14-Sep-2017	Dental care was clearly ignored in the tribal communities. Ashwini has been able to create awareness regarding dental health and one such beneficiary is Ganesh. Ganesh who is 26 years old had a severe infection in his upper jaw and was brought to the hospital by the health inspectors. Most of the health issues, including dental are identified by Ashwini's health inspectors and push them to come to the hospital and treat themselves. Ganesh who was in extreme pain is now happy. There was a complete dental procedure and medical follow ups for Ganesh. The health inspectors did not let Ganesh miss his follow ups, smirked Ganesh! He was been now referring people to take care of their dental health in the community	Ishwarya
TRN-0006611569/TD-0007240206	Save lives by reimbursing a fund set up to provide emergency support to patients	Mani	Success	14-Sep-2017	Mani was unavailable since he was not well. Mani is a 25 year old youth who was detected with extreme hypertension. Ammini, his guardian spoke about how worried she was because Mani used to collapse and used to be unconcious for long periods of time. Mani was taken to Ashwini and since this was a major case, they had referred him to Calicut hospital. Mani is now recovering. Ammini confirmed that they did not pay fees during the time Mani was admitted at Ashwini. Mani and Ammini belong to the Paniya community which is considered to be the least developed tribes. They were slaves before the independence period and Ammini is thankful to have access to healthcare irrespective of the community they belong to	Ishwarya
TRN-0006516701/TD-0007128126	Sponsor 10 meals for the caretakers of patients and tribal paramedic students at the Gudalur Adivasi Hospital	Kala	Success	14-Sep-2017	Kala recently became a mother and she is extremely happy about it. She loves her child more than her dear life. She enjoys playing and watching the child grow. She has big plans for her child and has promised herself to give the child access to best education and health care. He delivery was taken care by Ashwini and it was a normal delivery. Her mother had a huge relief on her face while Kala was talking about how easy it was for her! Kala and her mother confirmed that they were provided food free of cost during their stay at Ashwini. Kala had to stay over a week in the hospital and did regular follow ups for ante-natal care.	Ishwarya
TRN-0006516194/TD-0007127469	Sponsor 10 meals for the caretakers of patients and tribal paramedic students at the Gudalur Adivasi Hospital	Chathi	Success	14-Sep-2017	Chathi is old and has severe asthma issues. He was admitted in the hospital and Lakshmi his wife confirmed that they were provided meals during their stay at Ashwini. Chathi is getting better now however old age is catching up for him. MDO-0124/58	Provide nutrition for an under nourished poor tribal child	Srividhya	Success	14-Sep-2017	Srividhya has a troubled childhood as her father is extremely alcoholic and is least bothered about the family. She was a malnourished child. She has seen domestic abuse first hand and feels extremely scared of her father. She has a sibling too. Her mother is a strong woman and is extremely determined to provide nutrition to her children. She collects green gram, sattumavu and eggs (since Srividhya loves it) from the area center and ensures Srividhya consumes it. The health inspectors from Ashwini regularly monitor the weight and maintain a growth chart. Srividhya studies in SSA school and wants to become an engineer.	Ishwarya
MDO-0124/59	Provide nutrition for an under nourished poor tribal child	Ragesh	Success	14-Sep-2017	Ragesh is one of the most mischievous child in class. He studies in SSA school and loves mathematics. We met Ragesh and his mother in the school and she confirmed that they collect pulses and sattumavu from the area center every month. Her mother strongly believes that the progress in Ragesh's health is because of the nutritional supplements. Ragesh absolutely loves sattumavu drink.	Ishwarya
MDO-0124/153	Provide nutrition for an under nourished poor tribal child	Harikrishnan	Success	15-Sep-2017	Harikrishnan's parents were the most delighted during the visit. Harikrishnan was an extremely malnourished child and the progress has been great. They regularly collect green gram and Sattumavu and the parents are now delighted when Hari actively runs around and plays with his friends. Hari loves climbing trees and enjoys playing with his friends.	Ishwarya
