with mental retardation and cerebral palsy. The peculiar thing about her is that she cannot use her hands as they are totally spastic. As a result she has to use her legs for doing all necessary things which others do with their hands. She has mild degree of mental retardation and since 2000 January she comes to Manovikas as a regular student. She has a difficult family situation too. When she joined school her father was bedridden due to paralysis and at an early age her mother had already left the home. Later her father expired and now she is looked after by her uncle. School constantly kept all family members motivated for her special training in spite of all family problems. She often experiences pain in her joints but her commitment and rigorous training keeps her moving forward. She can eat, write, draw and paint with her feet. I want to add that "her paintings are superb". Now as a student in the vocational training unit she started learning computers at school. She can enter the data in English and Hindi with a reasonable speed.
